

## TAKE BACK CONTROL OF YOUR ENERGY CONSUMPTION. WITH THE FRONIUS SMART METER.

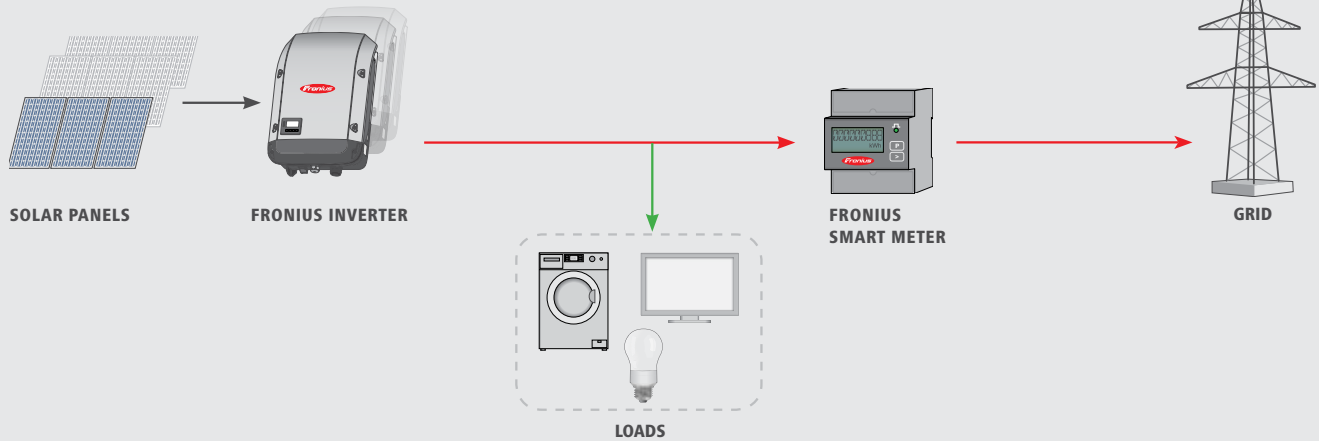

/ So you have a PV system and have chosen a Fronius inverter, but what about the energy you are producing? How do you know what is happening? It's simple when using a Fronius Smart Meter.

/ Connecting a Fronius Smart Meter to your PV system, coupled with a FREE Fronius Solar.web account enables you to take control of your energy consumption. By visualising the contribution of your PV system alongside your energy usage, it becomes easy to further increase your savings.

### WHY A FRONIUS SMART METER?

- / Find all the information you need in one place, presented graphically and incredibly easy to use.
- / Sustain full control with this solution that does not send any data back to your energy supplier.
- / Use the Fronius Smart Meter for advanced energy management. Use the energy management feature on your Fronius inverter to make use of any surplus energy produced.
- / See the size of the potential energy storage solution that would be ideal for your household.

## / How does it work?

/ The Fronius Smart Meter is a bidirectional meter for recording power consumption in the home with highly accurate measurements and rapid communication.

/ Monitor your complete system using your Fronius Solar.web account on your PC, laptop, tablet, smartphone or Apple watch.

/ Fronius Solar.web displays graphically the amount of energy your PV system produces and, with a Fronius Smart Meter installed, how much energy you use - in one simple and easy to use system. This allows you to see where you can maximise cost savings by managing appliances to fully exploit the energy you produce.

/ Using a Fronius Smart Meter with Fronius Solar.web will also allow you to monitor any problems with your PV system ensuring that any issues are fixed quickly, thus limiting the downtime of your system and loss of energy production.

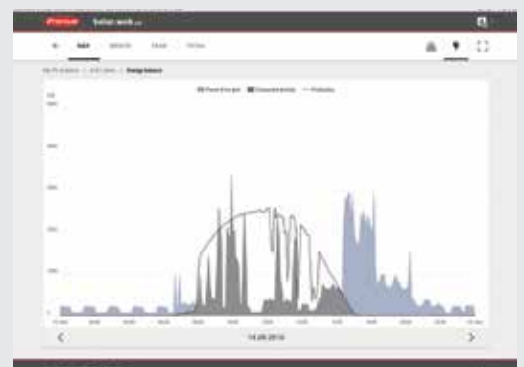

/ Simple PV system overview

## / What do I need to do?

/ **Contact your original PV installer.** They can install the Fronius Smart Meter to your PV system. Alternatively, contact us to find out who your local Certified Fronius Service Partners are.

/ **Ensure your Fronius Solar.web account is active.** You can start measuring your energy generation from the moment your PV system is installed. Visit [www.solarweb.com](http://www.solarweb.com) to set up your account and register your inverter. If you need help with this, contact your installer or give our tech team a call. We also have videos on our YouTube channel that can help you - visit [www.youtube.com/froniussolar](http://www.youtube.com/froniussolar) to watch online.

/ See how much energy you have generated, sent to the grid and used all in one place
